AMMAR ALI

AI Data, Evaluation & Linguistic Specialist

Shubra El-Kheima, Qalyubia, Egypt | +20 115 530 4924 | 2007ammarkhaledali@gmail.com | LinkedIn

LLM Evaluation | AI Safety & Red Teaming | Arabic Linguistic QA | Multimodal Data | Quality Assurance

PROFESSIONAL SUMMARY

AI data, evaluation, and linguistic specialist with hands-on professional experience since August 2025 across LLM response evaluation, Arabic linguistic QA, AI safety and red teaming, transcription/ASR, multimodal annotation, and quality review. Progressed into QA responsibilities at TELUS, reviewing other annotators' submissions and providing structured feedback, and later coordinated day-to-day contributors on an Arabic ASR project. Currently studying in the Faculty of Computers and Information Technology at EELU while expanding into applied AI and data projects.

PROFESSIONAL EXPERIENCE

AI Intern | FlyRank AI — **Jul 2026 - Present**

Remote

- Current AI internship role.

AI Trainer & Linguistic Evaluator | Welocalize — **May 2026 - Present**

Remote

- Evaluate and compare AI responses for Arabic language and localization quality, including dialect fit, grammar, punctuation, formatting, fluency, and naturalness.
- Create Egyptian Arabic prompts and follow-up prompts, evaluate generated responses, write golden responses when required, and document structured justifications.
- Contribute to safety-focused evaluation and additional Human Signal workflows across changing task types.

AI Evaluation & Red Teaming Specialist | Invisible Technologies — **Apr 2026 - Present**

Remote

- Conduct multi-turn personalization and red-team evaluations to identify model failures, privacy leakage, unsafe behavior, and inconsistent use of personal context.
- Support additional conversational, text, and audio annotation/evaluation workflows across project-based assignments.

AI Data Evaluator & QA Reviewer | TELUS International AI — **Aug 2025 - 2026**

Remote

- Evaluated AI-generated responses for instruction adherence, factuality, relevance, quality, length, and comparative preference across multi-response tasks.
- Reviewed audio transcription and voice outputs, image/video quality, multimodal instruction compliance, and search/query results against detailed guidelines.
- Progressed into QA responsibilities by reviewing annotator submissions, checking guideline compliance, and providing structured written feedback.

COORDINATION & SELECTED AI DATA PROJECTS

Arabic ASR Team Coordinator | Agents Only — **2026**

Remote

- Served as the main day-to-day coordinator for Arabic contributors on an ASR transcription project while reporting to the official company-side project lead.
- Communicated guidelines and updates, supported onboarding and team meetings, reviewed work quality, clarified edge cases, and coordinated issue follow-up.

Atlas Capture - Video Annotation & Temporal Segmentation: Segmented continuous videos into meaningful action intervals and wrote concise English descriptions of visible actions and events.

OneForma: Completed AI response preference-ranking tasks with written justifications and contributed to transcription and annotation workflows.

TaskUs: Contributed to safety and trust review workflows covering harmful or policy-sensitive conversational content.

SELECTED TECHNICAL PROJECTS

AI CV Scanner & Job Matching System | Personal / Training Project 2026

FastAPI · Streamlit · Sentence Transformers · Pandas

- Built an end-to-end recruitment prototype for CV creation and analysis, semantic job matching, candidate ranking, job dataset analysis, and professional CV generation.
- Implemented matching logic that combines skills, semantic similarity, experience, and education signals to support first-phase candidate screening.

LoRA vs QLoRA Fine-Tuning Comparison | Applied LLM Experiment 2026

OLMo-2-0425-1B-Instruct · PEFT · BERTScore · ROUGE-L

- Compared baseline, LoRA, and QLoRA approaches on a Q&A task while tracking quality metrics, training time, GPU memory, and trainable parameters.
- Evaluated generated answers with BERTScore and ROUGE-L to compare parameter-efficient fine-tuning approaches under the same training-step budget.

Customer Support Data Analytics | Data Analytics Project 2026

Python · Pandas · Visualization

- Analyzed 85,907 support-ticket rows, engineered temporal and response-time features, and examined CSAT, ticket volume, handling time, shift, tenure, and correlations.
- Prepared notebook-based analysis and visual summaries to explain the data-processing workflow and findings.

BBC News Text Classification | NLP Classification Project 2026

Python · TF-IDF · Logistic Regression · SVM · Naive Bayes

- Built a text-classification workflow with cleaning, label encoding, TF-IDF features, and multiple classical machine-learning models evaluated with cross-validation.
- Compared accuracy and macro-F1 across dataset versions and train/validation/test splits to investigate model and data-quality differences.

ADDITIONAL PROJECT-BASED EXPERIENCE

DataForce: Successfully completed a paid Modern Standard Arabic story-writing/content project.

Acolad / SuperAnnotate: Completed professional transcription workflows using the SuperAnnotate platform.

RWS: Worked on AI data annotation and model-evaluation tasks in guideline-driven project workflows.

Outlier: Completed rotating AI annotation and evaluation tasks across changing project types, with work-time tracking through Hubstaff.

PROJECT & CONTRIBUTOR COORDINATION

Coordinate access to a project-based network of 500+ experienced AI-data contributors and QA reviewers, with strongest coverage across Arabic and English workflows. Experience includes contributor communication, guideline rollout, quality follow-up, meetings, issue escalation, and delivery coordination.

EDUCATION

Faculty of Computers and Information Technology | The Egyptian E-Learning University (EELU) 2026 - Present

Ain Shams Study Center, Egypt

CORE SKILLS

AI Evaluation & Training: LLM response evaluation, response comparison, preference ranking, prompt creation/evaluation, golden-response writing, RLHF-related evaluation

AI Safety & Quality: Red teaming, personalization evaluation, content/safety review, QA review, reviewer feedback, guideline interpretation and compliance

Linguistic & Speech: Arabic linguistic QA, localization review, translation/proofreading, transcription, ASR review, audio segmentation, speaker labeling

Multimodal & Data: Text/image/video annotation, video temporal segmentation, multimodal evaluation, search and ads evaluation

Tools: SuperAnnotate, CVAT, Human Signal, Lark, Microsoft Teams, Slack, Discord, Google Workspace, Jira, Hubstaff

LANGUAGES

Arabic: Egyptian Arabic - Native; Modern Standard Arabic - strong professional proficiency; Gulf Arabic - strong professional proficiency; Levantine Arabic - strong professional proficiency

English: C1 professional working proficiency (self-assessed)
